

Laos electric vehicle incentives

Overview

The Lao government has introduced a series of initiatives to accelerate the growth of the electric vehicle market. These measures include tax incentives for EV buyers, subsidies for EV manufacturers, and investments in charging infrastructure. Electric Vehicles (EVs) are gaining momentum in Laos, driven by government incentives, rising fuel costs, and renewable energy potential. While still behind neighbors like Thailand, Laos' shift toward sustainable transportation is accelerating, thanks to hydropower-backed energy solutions. The emerging EV. The government recognizes EV adoption as a natural extension of its hydropower-driven electricity system—offering a pathway to cleaner urban environments, energy security, and reduced reliance on imported fuels. By encouraging EVs, the policy also aims to build domestic energy demand in a way that. The government of Laos will not impose import restrictions on electric vehicles to help promote them, but vehicles imported and marketed in Laos must fulfil international standards for quality, safety, after-sales services, maintenance, and waste management.
