

Latest on the solar inverter market

Overview

The global solar inverter market will contract for two consecutive years, declining 2% to 577 GWAC in 2025 and a further 9% to 523 GWAC in 2026, according to Wood Mackenzie's latest reporting. The downturn follows record shipments in 2024 and reflects market uncertainty across major regions. UK-based analysts GlobalData predict growth in the world's solar module and inverter markets through to the end of the decade will be driven by the Asia Pacific region. 33 Billion in 2026 and steadily progressing to USD 36. I need the full data tables, segment breakdown, and competitive landscape for detailed regional analysis and revenue estimates.
