

Lithium battery power station in Dominican-Republic

ESS

Overview

The Dominican Republic has several notable lithium battery energy storage projects: AES Dominicana Andres: A 10,000kW lithium-ion energy storage project located in Santo Domingo, commissioned in 2017. Estrella del Mar III: A 5,000kW lithium-ion energy storage. In a significant move to modernize the national power grid, the Unified Council of Electricity Companies (CUED) has unveiled a public tender for up to 600 megawatts (MW) of new renewable energy generation. Marking a national first, the bidding process mandates the inclusion of battery energy. Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The project was commissioned in 2017. A 15MW solar farm paired with a 8MWh lithium-ion battery system now provides 24/7 power to 6,000+ hotel rooms.

Lithium battery power station in Dominican-Republic

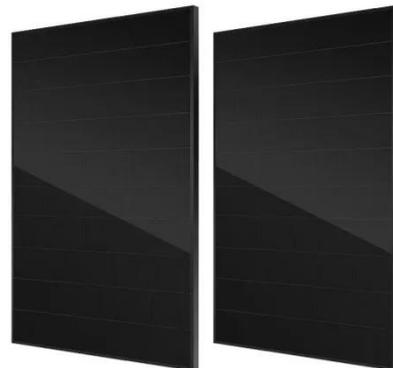

Dominican Republic lithium ion solar

The Dominican Republic's national energy commission CNE has granted a definitive concession for the construction and operation of a 49.98-MW/60.04-MWp solar farm equipped with a battery energy ...
