

# Low-voltage investment in Swiss microgrid energy storage battery cabinets

## Overview

---

Storage plants with a capacity of 150 megawatts or more are generally connected directly to Swissgrid's extra-high-voltage grid. Battery storage systems play an important role in this new energy system. For our society, this. ers lay out low-voltage power distribution and conversion for a b de ion – and energy and assets monitoring – for a utility-scale battery energy storage system entation to perform the necessary actions to adapt this reference design for the project requirements. As a result, they are far more appealing to a range of buyers, including enterprise and multi-tenant data center owners. Our solution encompasses not just the core technology, but our proven expertise in delivering full turnkey solutions with seamless HV/MV integration capabilities.
