

# Maldives communication base station energy storage construction

## Overview

---

Supported by the ADB through the Accelerating Sustainable System Development Using Renewable Energy (ASSURE) Project with a grant of US\$41.5 million for the project, the tender aims to provide BESS and energy management systems (EMS) across 18 islands in the Maldives and. The Maldivian government has signed a landmark agreement to deploy 38 megawatt-hours (MWh) of battery energy storage systems (BESS) alongside energy management systems (EMS) across 18 residential islands, as part of its transition to renewable energy. The initiative, backed by the Asian Development Bank, was announced in Mar, 2023. Project Team Leader made a site visit and did a brief consultation with the implementing agency, the Ministry of Environment (ME), on the key concerns. Jan. The Maldives is home to more than half a million people, who live across its hundreds of islands, most of them relying on expensive and polluting imported diesel for their electricity. Image: wikimedia user Nevit Dilman. PKENERGY designed a solar + energy storage. Will the 5G mobile communication infrastructure contribute to the smart grid?

In the future, it can be envisioned that the ubiquitously deployed base stations of the 5G wireless mobile communication infrastructure will actively participate in the context of the smart grid as a new type of power.
