

# Maldives solar container communication station solar power generation system hybrid power supply

## Overview

---

The solar hybrid system combines solar panels, a battery energy storage system (BESS), and a diesel generator (DG). During daylight hours, the island is powered entirely by solar energy, while the battery storage system ensures a constant power supply throughout the. Maldives is almost entirely dependent on imported fossil fuel as a primary source of energy used for electricity generation and transport. This large dependence raises the cost of energy and makes the country very vulnerable to any adverse impact on the availability and price of fossil fuel in the. A hybrid power plant with DEIF controllers is providing uninterrupted power for the Le Méridien Maldives Resort & Spa. “The project has given us the confidence to push on. The Maldives has taken a significant leap in its renewable energy journey with the installation of 12 new solar systems across the Thaa Atoll islands. As part of the landmark POISED project, this initiative is set to save 1., in collaboration with leaders from the Maldives Ministry of Tourism and Environment, held a project signing ceremony in Malé, the capital city.
