

Market Price of 80kWh Solar Containerized Wastewater Treatment Plant

Overview

Standard Package Wastewater Treatment Plants typically range from \$20,000 to \$400,000+ depending on capacity and technology. Note: Prices are equipment only; civil works, installation, and shipping are additional. For municipal owners, utilities, and consulting engineers, the cost of a wastewater treatment plant is determined less by any single process choice and more by how well the facility is aligned with local operating conditions, regulatory trajectory, and long-term system flexibility. As a modular solution, it is easily transportable by land or sea, with minimal onsite installation required.
