

Maximum capacity super large capacity capacitor

Overview

Supercapacitors, also called ultra capacitors or double layer capacitors, are specially designed capacitors that possess very large values of capacitance—as high as 12,000 F. They can be recharged very quickly and are used primarily for energy storage. It bridges the gap between electrolytic capacitors and rechargeable batteries. Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance. This article presents a strategy for choosing a supercapacitor and a backup controller for a given holdup time and power, considering the vagaries of supercapacitors over their lifetimes. Here's what makes them so interesting. Instead of using a conventional dielectric, supercapacitors use two mechanisms to store electrical energy: double-layer. Eaton Electronics HSH Hybrid Supercapacitors are high-reliability, high-power, ultra-high capacitance energy storage devices utilizing proprietary materials and processes.

Maximum capacity super large capacity capacitor

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
