

Microgrid Market Trends

Overview

The global microgrid market size was valued at USD 13.70 billion during the forecast period. It is projected to reach USD 82 billion in 2024 and is projected to grow at a CAGR of 18%. Market growth is being propelled by rising investment in grid resilience, the growing need for localized energy systems, and the transition toward renewable energy. The market is expected to grow from USD 36.5 billion in 2023 to USD 82 billion in 2024. A microgrid is a localized energy system that can operate independently or with the main grid, integrating distributed energy resources for reliable and efficient power distribution. Why Are Microgrids Essential for the Future of Modern Energy Systems?

Microgrids are decentralized energy networks capable of operating autonomously or in sync with the main utility grid. By 2024, the grid-connected segment has captured 62% revenue share in 2024.

Microgrid Market Trends

Microgrid Market Size, Share , Global Growth Report, 2034

The global microgrid market size was valued at USD 13.58 billion in 2025 and is projected to grow from USD 15.63 billion in 2026 to USD 57.58 billion by 2034, exhibiting a CAGR of 17.70% ...
