

# Mongolia s double-sided solar panels

## Overview

---

Manufacturers are now able to produce bifacial panels, which feature energy-producing solar cells on both sides of the panel. With two faces capable of absorbing sunlight, bifacial solar panels can be more efficient than traditional monofacial panels – if used appropriately. For businesses and homeowners. This comprehensive guide covers proper mounting height (0.5 meters for ground-mount), optimal array spacing to maximize rear-side irradiance, electrical configuration for increased current capacity, and site preparation for high-albedo surfaces.

### Everything About Bifacial Solar Panels [2026 Latest]

Unlike traditional panels, bifacial designs capture sunlight from both sides, using reflected light to boost energy output by up to 30%. With higher efficiency and the potential to lower overall system costs, ...
