

# Morocco electric vehicle charging infrastructure

## Overview

---

Morocco currently has 632 public charging points, including 142 fast-charging stations, with plans to add 100 more by the end of 2026. Funding shortages and unclear regulations prevent expansion. Morocco is emerging as a regional leader in electric vehicle (EV) adoption, driven by ambitious national policies, a growing renewable energy sector, and strategic investments in charging infrastructure. This report analyzes the national policies, market size, development status, opportunities, and. The Director General of the National Motorway Company of Morocco has announced an ambitious project aimed at expanding the network of electric vehicle (EV) charging stations along the country's key road corridors, in preparation for hosting the FIFA World Cup in 2030. Despite a growing market, the Intersectoral Professional Association for Electric Mobility (APIME) warns that regulatory and financial obstacles are slowing the transition.
