

Nairobi reduced carbon emissions

Overview

The city is committed to reducing emissions by 51% by 2035. This involves multifaceted approaches. These include urban greening, sustainable municipal solid waste management, and the adoption of clean transport alternatives. Green energy solutions are also part of this broader goal. The Nairobi City County Government has recently taken major steps to manage air pollution. While some areas still require further development in tackling air pollution, the city has made. Nairobi, one of Africa's fastest-growing cities, has made a significant commitment to tackling climate change by aiming to reduce its greenhouse gas emissions and achieve carbon neutrality by 2050. Breathe Cities is a first-of-its-kind initiative from Clean Air Fund, C40 Cities, and Bloomberg Philanthropies, dedicated to cleaning. Kenya's Nationally Determined Contributions target a low-carbon, climate-resilient development pathway.
