

# New Energy and Microgrid Report

## Overview

---

A new report by World Economic Forum and Accenture highlights a surge in energy-related patents, underscoring a shift from hardware to digital solutions, focusing on grid modernization, resilience, and customer-centric energy models. The world is not flat and neither is. NLR has been involved in the modeling, development, testing, and deployment of microgrids since 2001. A microgrid is a group of interconnected loads and distributed energy resources that acts as a single controllable entity with respect to the grid. microgrid market size was estimated at USD 14.

## New Energy and Microgrid Report

---

### Microgrids spread across US as Big Tech, utilities shore up power

Data center operators and other major power users are fuelling a new wave of microgrid investment as they seek access to reliable power supplies that can be developed swiftly.
