

# Nigerian rooftop solar panels BESS

## Overview

---

SolarEast BESS delivers expertly tailored solar battery and energy storage systems designed for Nigeria's unique climate, economic landscape, and evolving energy demands. However, the International Renewable Energy Agency's (IRENA) “ Renewable Energy Statistics 2024” report indicates Nigeria had only 35 MW of installed solar PV capacity by the end of 2023, compared to South Africa's 3,500 MW. High upfront costs and grid limitations hinder widespread adoption. In a groundbreaking partnership with Empower New Energy, Powercell Limited, and Huawei, Justrite Superstores proudly announces the commissioning of an innovative rooftop solar photovoltaic (PV) plant and battery energy storage system (BESS).

## Nigerian rooftop solar panels BESS

### Empower New Energy delivers first-of-its-kind solar PV

Through this first-of-its-kind solar + battery initiative, largely replacing energy from diesel gensets, Justrite Superstores showcases the significant role that Nigeria's Commercial and Industrial ...
