

No need for bracket photovoltaic color steel plate

Overview

Brackets for solar panels: supports for fixing the solar panel system, even without drilling. Sun-Age designs and produces the most efficient fixing systems for structures on tile roofs, such as the innovative BEE33 UNIVERSAL BRACKET which saves costs and installation times on most. What is a color steel plate roof?

Thin steel plate is formed by cold pressing or cold rolling. Installation. 235B steeland aluminum alloy extrusion profile AL6005-T5. Each material has its advantages and considerations, and the choice depends on various factors. However, steel frames are gaining traction. A PV bracket is a support structure that arranges and fixes the spacing of PV modules in a certain orientation and angle according to the specific geographic location, climate, and solar resource conditions of the PV power generation system construction.

No need for bracket photovoltaic color steel plate

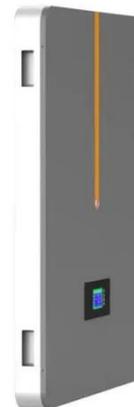

Classification And Design Of Fixed Photovoltaic Mounts

Color steel plate roof brackets and sloping roof brackets usually adopt finished C-beam steel or aluminum alloy as the main supporting structural parts. They have the advantages of fast ...
