

Off-grid Somaliland solar cabinet wind-resistant type for farms

Overview

The IP54 waterproof shell makes it perfect to adapt to a variety of indoor or outdoor industrial and commercial application scenarios, such as photovoltaic charging stations, industrial parks, farms, etc. Integrated Solar+ESS design, suitable for access of PV. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is. Backup power: Supply power to the load when the power grid is out of power, or use as backup power in off-grid areas. Enhance power system stability: Smooth out the intermittent output of renewable energy by storing electricity and dispatching it when needed. The cooling of the cabinet uses two sets of air conditioners. 1) The cabinet is made of high quality galvanized steel; 2) Surface treatment: degreasing, derusting, anti-rust phosphate (or galvanizing). Electrical enclosures in solar farms are critical for housing DC combiner boxes, AC distribution panels, battery storage systems, and communication cabinets.
