

# Phase-based payment for photovoltaic energy storage containers

## Overview

---

The OBBB terminates Section 25D for any solar or battery - paired or stand-alone - equipment installed after Decem. Until that date, homeowners may still claim the full 30% credit. There is no phase-down; the credit simply disappears in 2026. However, the upfront cost of a solar+storage system can be a significant barrier. Solar and wind projects must begin. The One Big Beautiful Bill Act (OBBB) is set to dramatically reshape how grid scale and residential energy storage systems are treated under federal tax law. The new budget package revises critical incentives laid out by the IRA, focusing particularly on foreign sourcing restrictions, new domestic. There are a host of money-saving incentives available to help make solar energy more affordable upfront, and to help you save and earn more from it for years to come. First, tax credits and rebates are only open to those households that own their systems and equipment.

## Phase-based payment for photovoltaic energy storage containers

### Self-Generation Incentive Program HANDBOOK

After 10 days, Program Administrators will determine if the incentive level reduction for energy storage technologies shall increase from \$0.05/Wh to \$0.10/Wh between incentive steps based on statewide ...
