

# Photovoltaic fixed support foundation weight package price

## Overview

---

Concrete piers run \$50-150 per foundation point. Earth anchors fall in the \$150-300 range. Equipment and labor costs depend on installation complexity and. Solar Foundations USA is the single source solution to meet your solar panel support structure needs. We offer engineering and design, foundation systems, racking components and efficient installations. Initial costs can vary, but they. A typical residential 10kW ground-mount system represents a \$20,000-30,000 investment, making proper foundation design critical for protecting that investment. Ideal for applications where soil conditions are poor.
