

# Photovoltaic panel edge trimming tool

## Overview

---

An automatic trimming machine is used to automatically remove burrs and excess materials from PV module edges after lamination. It can adapt to different sizes and shapes of panels and features high trimming quality, precision and speed. IronRidge Contour<sup>®</sup> Trim elevates the look of any solar array by providing a sleek trim (or skirt) across the bottom edge to hide components that are visible beneath the solar panels. Homeowners want the solar on their home to meet their energy needs, while not detracting from their home's. Used for edge trimming of laminated PV modules to remove excess encapsulation film, glass burrs, or backsheet overflow, ensuring clean edges and precise dimensions. Features synchronized four-side cutting for smooth, damage-free edges. Did you know that even a 2mm edge misalignment can reduce a solar panel's. They demand perfect angles, spotless surfaces, and occasional photovoltaic panel trimming to stay efficient.
