

Photovoltaic panel factory price

Overview

The solar panel factory cost varies widely based on scale. A smaller, 1-gigawatt (GW) facility might cost between \$100 million and \$200 million, while a large, state-of-the-art gigafactory can easily exceed \$1 billion in investment. NLR analyzes manufacturing costs associated with photovoltaic (PV) cell and module technologies and solar-coupled energy storage technologies. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. Understanding solar panel pricing is critical for distributors, project developers, and commercial buyers.
