

# Photovoltaic panel installation horizontal groove

## Overview

---

Horizontal installation is traditionally preferred on rooftops due to simpler cabling and lower wind load, while vertical installation performs better in drainage and architectural integration. Most homes achieve better results with a horizontal orientation, especially when aiming to capture the most sunlight on the panels. Research shows that panels installed at typical roof angles can generate over 90% of the optimal energy annually. However, vertical installation can also be effective. I plan in installing 12x Longi LR66-495M modules horizontally. Should the rails run perpendicular to the modules?

If perpendicular, should the rails align with the inner or outer mounting holes on the panel, if parallel, inner on the short frame or corners?

The longi installation instructions dont. In residential and commercial photovoltaic projects, the orientation of PV modules is far more than a simple installation choice — it affects system efficiency, drainage performance, aesthetics, and maintenance requirements. The two most common orientations are: 1. Sunlight has tive to the sun affects the efficiency of the panel solar panels on.

### ENERGY STORAGE SYSTEM

**Product Model**  
 HJ-ESS-215A(100KW/215KWh)  
 HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
 1600\*1280\*2200mm  
 1600\*1200\*2000mm

**Rated Battery Capacity**  
 215KWH/115KWH

**Battery Cooling Method**  
 Air Cooled/Liquid Cooled

### Horizontal Panel Installation

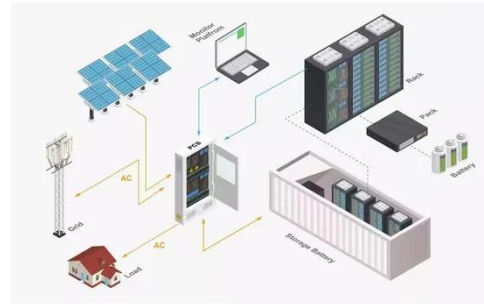

I have done quite a bit of reading and there seems to be some confusing information on the best way to install horizontal panels. I plan in installing 12x Longi LR66-495M modules horizontally.
