

# Photovoltaic panel junction box scrapping and removal

## Overview

---

Next, our video will demonstrate how to automatically remove solar junction boxes from decommissioned solar panels, as well as how to recover valuable metals and non-metal plastics through crushing and sorting after removal. The first step in photovoltaic panel recycling is to dismantle solar panels. Speaking of dismantling, do you know how to remove the junction box on the photovoltaic panel?

1. Essential Safety Measures Before Starting Safety is critical when working with electrical systems: Wear PPE: Use gloves. Wiring, junction boxes, and combiner boxes play a vital role in the system's performance—and when it's time for an upgrade or removal, these components must be disposed of properly. Junction boxes are typically made of polypropylene (PP), silicone, and copper or aluminum components.

### Removal and replacement of photovoltaic panel junction box

A solar panel junction box is a critical component of any solar energy system, allowing the safe connection between the photovoltaic (PV) panels and the rest of the electrical system.
