

# Photovoltaic panel life

## Overview

---

Long story short, a solar panel's lifespan is about 25 to 30 years. Its performance naturally declines over time, eventually rendering its "useful life" complete. Solar panels. Solar panel life span typically ranges from 25 to 30 years, though, with advancements in technology and proper maintenance, some panels continue to operate effectively well beyond this range. This extended life span of new solar panels means fewer resources are used in the short term, as the need. Understanding the lifespan of solar panels is crucial for making an informed decision about installing a solar energy system. This comprehensive guide dives into everything about the average life of solar panels.
