

# Photovoltaic panel power generation seal

## Overview

---

The seals, which include silicone, EPDM, and butyl, play a critical role in ensuring the solar panel's longevity, efficiency, and protection against moisture and debris. SolarGain® Edge Sealant is a desiccated butyl/desiccated polyisobutylene (PIB) solar panel sealant designed for use in a wide variety of photovoltaic (PV) modules. Trusted by PV module manufacturers for more than 20 years, this solar edge seal tape protects cells, connections and transparent. Solar Panel rubber sealing strip use high quality EPDM material, It has good anti-aging effect and long service life. It can be used outdoors for a long time. Solar photovoltaic panel gap sealing strip. Whether it is in the hot desert or the cold polar regions, it maintains stable performance and provides long-term reliable sealing protection for your photovoltaic.
