

Photovoltaic panel transportation price

Overview

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500. How much does it cost to transport solar panels?

To transport solar panels, the cost typically ranges from \$500 to \$5,000, based on various factors like distance, panel quantity, and transport method. Transportation fees vary according to distance, meaning longer distances generally incur higher. Thinking of going solar and want to know how much it will cost to ship those panels in a shipping container?

You're not alone. LTL shipping is used for small freight or when the items don't require the use of an entire trailer. Unlike regular deliveries, solar panel transportation needs extra care. These panels are fragile, heavy, and expensive.
