

# Photovoltaic panels cut down trees

## Overview

---

Will you have to cut them down to make your solar dreams come true?

The good news is that a little shade shouldn't be a problem. The long-term environmental benefits of a solar installation likely outweigh the drawbacks of cutting down a tree or two. A solar panel installation in your home can bring all sorts of benefits: lower electric bills, a smaller carbon footprint and even. Deciding whether to cut down trees before installing solar panels is something many homeowners wrestle with — particularly in Washington state. The beauty of tall evergreens, big leaf maples and other popular trees is one of the things that makes the Pacific Northwest a wonderful place to live. But. Trees can block sunlight from hitting your solar panels, which can substantially reduce their performance and energy production. Here's the good news: you don't need to clear-cut your property to start using solar panels.
