

# Photovoltaic panels were not connected to the grid in time after installation

## Overview

---

This article aims to demystify solar technology, breaking down the key elements of a solar panel system, providing a step-by-step guide to verifying grid connections, troubleshooting common issues, and knowing when to call for professional help. Some issues can be resolved from the convenience of your home, without the need for additional technician assistance. Can I Leave Solar Panels Disconnected?

Yes, it is ok to leave a solar panel disconnected. There is no harm in unplugging the panels or turning it off, but it has few benefits. If you disconnect the modules, you have to wait for the panels. Solar panels are a great investment for most homes and businesses, but a surprising number of owners do not know if their solar panels are working correctly or if the system is performing as expected.
