

Photovoltaic power generation

How much does a photovoltaic panel cost

Overview

For most homeowners, a full residential solar setup, panels, inverters, mounting hardware, permitting, and professional installation, runs between \$15,000 and \$30,000 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. How much do solar panels cost on average?

As of 2026, the average cost of residential solar panels in the U. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). The total price depends. The answer isn't a single number you can pull from a chart. Incentives also change from one state to another, shaping the final price dramatically. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. NLR's PV cost benchmarking work uses a bottom-up. Enter your address and the cost of your most recent electric bill Our estimator shows how many solar panels your home needs We generate an online cost and savings estimate You choose how many solar companies send you an exact price by email or text Click on your state for solar panels cost.
