

# Photovoltaic support material acceptance

## Overview

---

This IR clarifies the requirements for structural support of solar systems, anchorage of solar systems, solar support frame systems, balance-of-system (BOS) equipment, and building-integrated photovoltaic (BIPV) roofing systems. This encompasses: Flush-mount systems: these are systems installed. This Interpretation of Regulations (IR) describes the DSA requirements for review and approval of solar systems used in construction projects under the jurisdiction of DSA. The development of novel materials for solar photovoltaic devices holds great potential in order to check its suitability. Example F5 Reject: Non-Uniform Color.

## Photovoltaic support material acceptance

---

### Photovoltaic support acceptance standards

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing ...
