

Plastic cover of photovoltaic panel

Overview

A solar panel plastic cover, specifically a T-shaped rubber-plastic sealing strip, is a weatherproof barrier installed along the edges and gaps of photovoltaic panels to prevent moisture ingress, dust accumulation, and thermal expansion damage. New solar panels often arrive with protective film—but should it stay on?

This comprehensive guide explains the crucial difference between factory shipping films (which must be removed) and aftermarket plastic covers (which have specific valid uses). Learn proper removal techniques, understand. Check each product page for other buying options. Manufactured on farms or in facilities that protect the rights and/or health of workers. The Blue Wave 8-Mil Solar Blanket is strong against UV rays for solar roof panels. However, it is important to note that the type of plastic you use and how you apply it can affect the efficiency of your solar panels.
