. Whether you live in an area prone to power outages or want to take a way to power up with you on the road or camping, a portable power station can be an excellent investment, especially in the dark and cold winter months. These are a highly affordable alternative for a backup generator, and now is. Portable power stations can deliver power when you need it most, whether during power outages or just for an off-grid adventure. These handy electricity suppliers vary in size, output, and energy source, not to mention durability. That's why we've tested 22 models since 2022; some we've kept on. PWRcell 2 lets you use solar and battery at the same time and allows a generator to recharge the battery, maximizing home backup power.
