

# Price list of photovoltaic support cast-in-place piles

## Overview

---

Installing photovoltaic support piles typically costs between \$15 to \$80 per linear foot, but don't let those numbers fool you - solar foundations are like snowflakes, no two projects are exactly alike. The final price tag depends on a fascinating cocktail of geology, engineering requirements, and. The pile foundation costs is influenced by various parameters. geological conditions The subsoil. Post spikes are metal brackets that set into the fence post or concrete footing to ensure the constructions firmly fixed in the desired place. The MSP results for PV systems (in units of 2022 real USD/kWdc/yr) are \$28. 83 (commu costs (Wood Mackenzie and SEIA 2022b). Our interviews also indicated market and policy trends affecting s t around 20% of reported market prices.
