

# Price of 450 photovoltaic panels installed on roof

## Overview

---

Rooftop solar installation typically costs about \$23,100, with most projects ranging from \$19,100 to \$23,800 depending on system size and location. Under current federal law, the Residential Solar Tax Credit (ITC) ended for customer-owned systems on Decem. This is a good time to install a photovoltaic solar power system on your property. Residential rooftop PV solar panels cost per watt installed has been dropping and newer technology is enabling a far greater efficiency - that's more solar energy converted into electricity for home usage - for less. Homes with unshaded, south-facing roofs produce more electricity per panel, meaning you can use fewer panels to meet your energy needs — lowering overall costs. “The worst place would be to install on north-facing roofs, especially if those roofs have a high pitch,” Flores said. 50 and largely depends on the home's geographical area. NLR's PV cost benchmarking work uses a bottom-up. Installing solar panels can be one of the most impactful improvements you can make - allowing you to take control of electricity bills, protect your home from outages and increase the value of your property while producing energy directly on the roof.
