

Price of Civilian Solar Photovoltaic Panels

Overview

As of 2026, the average cost of residential solar panels in the U. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. With utility rates rising at a rapid pace, going solar is a way to take control of your electricity costs and hedge against energy inflation. Our team of solar experts. Our estimator shows how many solar panels your home needs We generate an online cost and savings estimate You choose how many solar companies send you an exact price by email or text Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live. Plus, we'll show you how Project Solar can make the process easier and more affordable with transparent pricing and no sales pressure.

Price of Civilian Solar Photovoltaic Panels

Solar Panel Cost: How Expensive are Solar Panels?

In the USA, residential solar panel costs range from \$0.75 to \$3.60 per watt. Monocrystalline panels are the most expensive solar panel type, usually costing \$1 to \$1.50 per watt, ...
