

Price of new energy photovoltaic panels

Overview

As of 2026, the average cost of residential solar panels in the U. This typically translates to about \$2.50 per watt of installed capacity (more on price per watt below). Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your. With utility rates rising at a rapid pace, going solar is a way to take control of your electricity costs and hedge against energy inflation. Combined with the tax credit, homeowners can achieve payback periods of just 6-10 years. Significant Regional Variations: Solar costs vary.
