

Price quote for an 80kWh power storage cabinet project for a battery swapping station

Overview

EV battery swap infrastructure costs range from \$500,000 to \$1.5 million per station, depending on factors like land acquisition and equipment fees. 5 acres of land per station and navigating. Buyers typically see capital costs in the hundreds to low thousands of dollars per kilowatt-hour, driven by project size, technology, and siting. Here's what shapes the final quote: Prices aren't one-size-fits-all. The projections are developed from an analysis of recent publications that include utility-scale storage costs.
