

Question mark outdoor power supply first use

Overview

When you unbox a brand-new outdoor power station, it's tempting to start using it immediately. But here's the catch: most lithium-ion batteries arrive partially charged, not at full capacity. Manufacturers like EK SOLAR recommend an initial "activation charge" to optimize. After receiving your GREEN POWER outdoor power supply, the first charge is crucial. Learn industry-proven tips and avoid common mistakes. Use a Ground fault circuit interrupter (GFCI). Keep products with line cords away from sinks, puddles, pools, ponds, and hot tubs. Exposed. When using electrical equipment or working near power lines outdoors, weather conditions and the presence of utility equipment present safety risks that are not typically found indoors. However, each year hundreds of people die, thousands are injured and millions of dollars in property damage are caused by electrical hazards to cords, plugs and wiring. This pamphlet explains electrical safety devices that, when properly used and maintained, can reduce or prevent accidents.
