

# Regulations on uninterruptible power supply batteries for communication base stations

## Overview

---

This article clarifies what communication batteries truly mean in the context of telecom base stations, why these applications have unique requirements, and which battery technologies are suitable for reliable operations. For purposes of this section, a Covered Service is any facilities-based, fixed voice service offered as residential service, including fixed applications of wireless service offered as a residential service, that is not line powered. mil for downloading or ordering. RELEASABILITY: There are no releasability restrictions on this publication. This publication implements Department of the Air Force (AF) Policy Directive (DAFPD). Uninterruptible power supplies or UPSs are battery chargers consisting of a combination of convertors, switches and energy storage devices (such as batteries), constituting a power system for maintaining continuity of load power in case of input power failure.

## Regulations on uninterruptible power supply batteries for communi

### Uninterruptible Power Supplies , Department of Energy

The U.S. Department of Energy (DOE) has published (link is external) a Federal Register Final Rule (FR) amending its test procedure pertaining to Uninterruptible Power Supplies ("UPSs).
