

Resort uses 250kW off-grid solar cabinet

Overview

The project deploys 1 unit of 125kW/258kWh energy storage cabinet paired with 1 unit of 125kW PCS (Power Conversion System). The PCS enables high-efficiency bidirectional power conversion and precise energy flow management, ensuring stable operation of the resort microgrid. Our client operates a 5-star resort with 20 rooms on a private island in Panama, dedicated to delivering a luxurious experience to their guests. As part of their energy plan, they sought to implement a green energy solution to reduce dependence on traditional power sources. The resort, featuring 20 high-end guest rooms, sought an eco-friendly and sustainable energy solution to address the island's power needs while reducing. Thirty miles off the Pacific Coast of Panama is an off-grid Eco Island Adventure Resort fully supported by solar, battery, and generators with no utility connection. This integrated approach. Our extremely resilient Quattro 48/15000/200-100/100 inverter/charger is the heart of many global off-grid installations.
