

Riyadh electric vehicle policy

Overview

Through the Saudi Green Initiative launched in 2021, the Kingdom set a target for 30% of vehicles in Riyadh to be electric by 2030. In line with this vision, Crown Prince Mohammed bin Salman unveiled CEER in 2022, the country's first homegrown EV brand, created in partnership. Saudi Arabia is making significant strides in its transition to eMobility as part of its broader Vision 2030 strategy, which aims to diversify the economy and achieve net-zero carbon emissions by 2060. Today, we will focus on the e-mobility transition in KSA. The Kingdom's Vision 2030 initiative has positioned fleet electrification in Saudi Arabia as a cornerstone of its ambitious sustainability goals, driving unprecedented investments and regulatory changes that are reshaping the transportation landscape across the region. This approach helps in addressing regulatory challenges and ensuring rt mobility solutions. Together, these two developments showcase the Gulf's ambition.

Riyadh electric vehicle policy

KSA eMobility Outlook 2024

The Kingdom has set an ambitious goal to transition 30% of all vehicles in Riyadh to electric by 2030, as part of a larger strategy to reduce emissions in the capital city by 50%¹.
