

# Rome tesla solar roof

## Overview

---

In 2022, Electrek reported that Tesla installed solar roofs for the first time and confirmed that the Company deployed 2.5 MW of solar roofs during the second quarter of 2022, equivalent to approximately 23 roofs per week, which is far short of its goal. Install Solar Roof and power your home with a fully integrated solar and energy storage system. When launching the solar roof in 2016, CEO Elon Musk presented it as a critical product to accelerate solar power deployment, as it opens up the market to people who want to go solar but also need to replace their roof soon. But the reality of availability, pricing, and installation has proven more complex than early projections. Tesla began manufacturing its solar roof Tiles in August of 2017. Its energy-generating tiles blend seamlessly with non-energy tiles, creating a visually unified surface.
