

Rooftop solar glass insulation solution

Overview

PV IGU, or Photovoltaic Insulated Glass Unit, is an innovative technology that integrates the benefits of insulated glass with the power of solar energy to create a highly efficient and sustainable solution for roofs and facades, integrated to buildings that seek sustainability. Find the perfect match for your climate and budget. optimal insulation materials are selected, 2. Focus on reflecting heat outwards, preventing heat absorption, and. However, how to safely and efficiently install flexible solar panels on glass surfaces has become a challenge for many homeowners. They blend seamlessly into your home's design while generating sustainable energy.

Rooftop solar glass insulation solution

Photovoltaic glass: the perfect fusion between energy efficiency and

In our mobile and fixed roofs we use the latest generation photovoltaic glass, ideal for any type of application due to its minimal chemical pollution and zero noise pollution.
