

Rwanda Energy Storage Policy

Overview

The Rwanda Energy Policy (REP, 2015) highlights measures that need to be undertaken to promote energy efficiency through a combination of approaches such as regulations, new codes and standards, introduction of economic incentives such as subsidies for installation of solar water. The Rwanda Energy Policy (REP, 2015) highlights measures that need to be undertaken to promote energy efficiency through a combination of approaches such as regulations, new codes and standards, introduction of economic incentives such as subsidies for installation of solar water. Smoke from polluting and inefficient cooking, lighting, and heating devices is a leading contributor to respiratory diseases and death in Rwanda. 4 Where provision of cost effective, appropriate solutions to the poor is enabled, particularly in rural areas, poverty reduction and health benefits can. lenges and opportunities the world faces today. Whether one speaks of maintaining national stability, economic growth, protecting ecosystems or promoting social equity, they all hinge at least to some de ree on access to secure and sustainable energy. Energy Guidance Frameworks

----- 10 2. Electricity Generation. The Institute for Sustainable Futures (ISF) was established by the University of Technology Sydney in 1996 to work with industry, government and the community to develop sustainable futures through research and consultancy. The Minister for Infrastructure, Dr Jimmy Gasore, opened the GRC led Renewable Energy for Sustainable Growth Conference in September last year, and it is encouraging to see many of the themes discussed.
