

Small fishing boat with solar power

Overview

The SRAV, or “shark” in Malayalam, delivers a groundbreaking alternative to traditional diesel-powered fishing boats. Created by industry pioneers Navalt, this solar-electric fishing catamaran is purposefully built to address the inefficiencies and unsustainability of conventional. Our smart and fun solar electric boats are sustainable, easy to use and provide modern sea lovers with peaceful and quiet freedom. Elvene's drivetrains will take you at least 20 NM, even if you'd be riding inside a cave - which in all honesty sounds just like the kind of cool thing a real Elvene. The SRAV stands as the world's first solar-electric fishing boat, embodying our commitment to innovation and sustainability. Powered by a high-performance 3HP electric motor, the Elcat consumes 90% less energy than traditional motorboats. Streamlined design allows it to effortlessly glide over the water. Carry up to 6. Imagine gliding across a lake powered only by sunlight: no fumes, no noise, just the gentle hum of an electric motor. It uses photovoltaic panels — those sleek, flat modules you've seen on rooftops — to capture sunlight and convert it into electricity.
