

Overview

Total installed photovoltaic (PV) capacity in Chile reached 11. [1] In 2024, Solar energy provided 19. [1][2]. Chile generated roughly 7 percent of its electricity from solar power in 2018. Its PV capacity was 2137 megawatt and it increased to 3104 megawatts by July 2020 with yet another 2801 Megawatt to be added recently. [1][2] In October 2015 Chile's. Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS). The country as part of that ambition has a goal of producing at least 70% of its electricity from renewable energy by the end of. Owned by Global Power Generation, a Naturgy Group subsidiary, and the Ibereolica Group and boasting an installed capacity of 206 MW, the Cabo Leones II Wind Farm began injecting energy into Chile's National Electricity Grid (SEN) on 10 October of 2020 with the connection of its first unit to the. Chile stands as a global beacon for solar energy, boasting the world's highest solar irradiance in its Atacama Desert.
