

# Solar glass made of acrylic

 **TAX FREE**    

## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

## Overview

---

This is an extruded polycarbonate glazing material that consists of multiple panes connected by ribs. Commonly there are two panes, but there can be up to 5 panes. The TERLI Solar Glass series seamlessly integrates high-efficiency photovoltaics into architectural glass. From transparent panels to large-format, patterned, and insulated designs, our solutions combine clean energy generation with modern façade aesthetics—perfect for office towers, public. Solar glass that is used in manufacturing solar panels is not like ordinary glass; it has one or both sides with an anti-reflective coating. You're not just choosing glass; you're choosing a future where sustainability is clear as day.

## Solar glass made of acrylic

## Tinted Plastic Sheets

Tinted acrylic has a high strength-to-weight ratio that offers durability that you cannot find in glass products -- while also protecting your home or business from the sun.

## Glazing Options & Glass Types

Low emissivity (Low-E) glass is used to control light and solar heat gain in a room. This is achieved by applying a thin coating of metal, either silver or tin oxide, to the inner surface of the exterior glass pane.

## Solar Glass Panels: A Window to Sustainable Energy

Solar glass panels work on the same principle as traditional solar panels. They are made of photovoltaic (PV) cells that convert sunlight into electricity. However, what sets them apart is their transparency.
