

Solar inverter and battery communication

Overview

They exchange information about voltage, charging levels, safety limits, and when to store or release energy. When you install a solar + battery system, most of the magic happens behind the scenes; your inverter and battery constantly “talk” to each other. But how do they communicate?

The answer. Is it worth spending a little extra to get both from the same manufacturer to get communication between inverter/battery?

Can equipment from different manufacturer communicate?

Any help would be appreciated. Even a doofus can achieve high post counts.

Solar inverter and battery communication

How Inverters Talk to Your Battery: Communication Protocols ...

When you install a solar + battery system, most of the magic happens behind the scenes; your inverter and battery constantly "talk" to each other. They exchange information about ...
