

Solar power generation air conditioner Gree

Overview

Gree is dedicated to the research and reformation of air conditioning technology. The Gree Photovoltaic Direct-driven Inverter Multi VRF System breaks through tradition, innovatively combining photovoltaic power generation with the power consumption of an air conditioner. By adopting advanced. The Chinese manufacturer said its new photovoltaic air conditioner is available in three versions with a cooling capacity ranging from 12.1 kW to 16 kW and a heating capacity of 14 kW to 18 kW. Have you heard about the latest buzz in renewable energy technology, especially in the arena of eco-friendly appliances?

It's something that could revolutionize how we keep cool during those sweltering summer. Gree GMV5 Solar Generation adopts inverter compressor technology, with capacity range from 3 Ton to 4 Ton.
