

# Solar power generation is a NIMBY project

## Overview

---

Across the United States, the rise in solar project proposals has met growing resistance from communities expressing “Not in My Backyard” (NIMBY) concerns. Researchers at Columbia University track local bans on renewable energy projects. In the last year alone, there has been a 111% increase in. A US national survey published in *Frontiers in Sustainable Energy Policy* shows that most people living near large-scale solar projects feel positively or neutrally about them, and only 18% would oppose additional development.
