

Solar power generation projects are there

Overview

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. No speculative or half-built megaprojects and planned expansions. These. As of 2025, solar energy continues to lead the global shift towards renewable resources, with significant advancements in large-scale projects, community solar initiatives, and innovative applications like agrivoltaics. These developments not only enhance energy production but also promote. Electricity generation by the U.S. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. Carbon dioxide. Explore more planned energy projects in the US. On this page, you can explore our database of planned solar projects in the US. You can browse a project profile by clicking on the project name.

Solar power generation projects are there

Solar power generation drives electricity generation growth over the

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...
